

CLAIMS

What is claimed is:

1. A charcoal grill assembly including a generally non-round pan including:
a generally vertical wall;
a non-round generally horizontal base including an aperture; and
a slope leading downward and inward from said wall to said aperture.
2. The charcoal grilling assembly of claim 1 further including a removable receptacle for receiving waste from said pan, said removable receptacle positioned under said aperture.
3. The charcoal grilling assembly of claim 1 wherein said pan is installed in a cart.
4. The charcoal grilling assembly of claim 3 wherein said pan has a perimeter and said cart includes a frame and said frame has an interior perimeter and said interior perimeter of said frame is less than said perimeter of said pan.
5. A charcoal grill assembly including:
a generally non-round pan including a base; and
a removable receptacle for receiving waste from said pan, said removable receptacle positioned under said base of said pan.

6. The charcoal grilling assembly of claim 5 wherein said base is generally horizontal and said pan includes:

a generally vertical wall;

an aperture in said base of said pan; and

a slope leading downward and inward from said wall to said aperture.

7. The charcoal grilling assembly of claim 5 wherein said pan is installed in a cart.

8. The charcoal grilling assembly of claim 7 wherein said pan has a perimeter and said cart includes a frame and said frame has an interior perimeter and said interior perimeter of said frame is less than said perimeter of said pan.

9. The charcoal grilling assembly of claim 6 further including a mounting wherein said receptacle is slidably positioned under said aperture.

10. The charcoal grilling assembly of claim 9 wherein said receptacle includes a handle and said handle is used to position said receptacle along said mounting.

11. The charcoal grilling assembly of claim 6 wherein said receptacle is removably positioned into said aperture.

12. The charcoal grilling assembly of claim 11 wherein said receptacle further includes a tab and said tab is used to position said receptacle into said aperture and remove said receptacle from said aperture.

13. A charcoal grill assembly including:
a generally non-round pan; and
a grill cart, wherein said pan is installed in said grill cart.
14. The charcoal grilling assembly of claim 13 wherein said pan includes:
a generally horizontal base including an aperture;
a generally vertical wall; and
a slope leading downward and inward from said wall to said aperture.
15. The charcoal grilling assembly of claim 14 further including a removable receptacle for receiving waste from said pan, said removable receptacle positioned under said aperture.
16. The charcoal grilling assembly of claim 13 wherein said pan has a perimeter and said cart includes a frame and said frame has an interior perimeter and said interior perimeter of said frame is less than said perimeter of said pan.
17. The charcoal grilling assembly of claim 13 wherein said cart includes wheels for assisting the movement of said cart.
18. A charcoal grill assembly including:
a generally non-round grill pan including a base;
a generally non-round grill lid including a top limit; and

a vertical extent measured from said base to said top limit when said lid is positioned directly on top of said pan; wherein said vertical extent is greater than 14 inches.

19. The charcoal grilling assembly of claim 18 wherein said base is generally horizontal and said pan further includes:

a generally vertical wall;

an aperture in said base of said pan; and

a slope leading downward and inward from said wall to said aperture.

20. The charcoal grilling assembly of claim 19 further including a removable receptacle for receiving waste from said pan, said removable receptacle positioned under said aperture.

21. The charcoal grilling assembly of claim 18 wherein said pan is installed in a cart.

22. The charcoal grilling assembly of claim 21 wherein said pan has a perimeter and said cart includes a frame and said frame has an interior perimeter and said interior perimeter of said frame is less than said perimeter of said pan.

23. A charcoal grilling assembly including:

a generally non-round pan having a perimeter; and

a grill cart, wherein said pan is installed in said grill cart and said cart includes a frame having an interior perimeter; wherein said interior perimeter of said frame is less than said perimeter of said pan.

24. The charcoal grilling assembly of claim 23 wherein said base is generally horizontal and wherein said pan further includes:

an aperture in the base of said pan;

a generally vertical wall; and

a slope leading downward and inward from said wall to said aperture.

25. The charcoal grilling assembly of claim 24 further including a removable receptacle for receiving waste from said pan, said removable receptacle positioned under said aperture.

26. The charcoal grilling assembly of claim 23 wherein said cart includes wheels for assisting the movement of said cart.
